In-School Dental Care For Your Students

At **no cost** to your school!

Dental decay is the No. 1 disease of childhood, but it's preventable!

Too many students are missing class time and learning opportunities because they can't access dental care. The impact is real:

- 35% of student absences are dental related.
- 4 out of 5 low-income children do not see a dentist during the course of a year.
- 1 in 7 children (5-12 years) are in dental pain right now!

Keeping Students Healthy, in School, and Ready to Learn

Our in-school dental program removes barriers to care by bringing the dental team directly to your school.

- We set up a mini dental clinic right at your school.
- Care is provided by local, licensed dental professionals.
- There is **NO COST** to schools or to children covered by Medicaid/CHIP.
- It's a convenient option for parents—no missed work or transportation challenges.
- Care is delivered in the comfortable, familiar school environment.
- We're a trusted program serving schools since 1997.

Easy for Schools. Easy for Parents.

Parents can enroll their children through a simple online sign up, making participation easy to manage for both families and school staff.

Find out how easy it is to give your students healthier smiles
and a better chance to succeed in the classroom.
